The PowerLine® PL16 Pilot Light features polyester construction for superior corrosion resistance, moisture rejection and electrical insulation. All units are supplied with #6 terminal screws with self-lifting captive wire clamps to accommodate #22 through two #12 AWG wires per terminal. Nickel-plated clamp rings are ideal for corrosive environments. All units mount in a round 16mm (5/8") hole and are directly interchangeable with competitor units.

To select a PowerLine® Pilot Light:

1. Identify your input voltage from the chart below.
2. Select the appropriate PowerLine® LED part number.
